TASTING NOTES

Red Amic is a wine with a great intensity of color, cherry or intense garnet, with violet border.

The nose is complex and intense. Deeply fruity, predominantly ripe red fruits. In addition to wild fruits, balsamic aromas of pine and Mediterranean herbs, which bring freshness, toast, vanilla, cinnamon, aniseed, pepper and a defined mineral touch are easily detected.

In the mouth it is powerful, structured, persistent and elegant, although with a certain finesse. It is fresh and expressive, with a corpulent entrance where you can appreciate the ripe fruit.

Given its good acidity, its alcoholic content and all the above characteristics, this wine has a great capacity for aging.

Climatologically, in our area, 2022 was a hot and dry year. The rainfall was distributed mainly outside the vegetative and maturation period of the plants, so they suffered a lot from the drought. This translated into smaller productions and smaller, more concentrated grapes. However, contrary to what might be expected, acidities remained at desirable levels and sugar levels were contained.

All this results in very expressive wines, with a lot of fruit, fine and elegant tannins, with freshness, a restrained alcoholic level and, for all this, a very good potential for aging and evolution, giving a young wine like Amic red a long life expectancy.

Wine Conservation:

For optimum evolution of the wine in the bottle, it is advisable to keep in place at a more or less constant temperature between 9 and 17 °C, with relative humidity of 65-80%, protected from light and, if possible, out of its box and horizontally if it is not going to consume in a short space of time.

Consumption Tips:

Suitable to be tasted from the moment it is bottled. Its optimum of consumption begins from the first year after its bottling. However red Amic can be considered a wine of guard, with characteristics that allow it to evolve favorably and to last for many years, as long as the bottle has been kept in the proper conditions of conservation.
